DETAILED ACTION

This Office Action is in response to the filing of the application.

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the wires connecting the photosensitive chip to the "upper surface of the lower metal sheets" must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner,

Art Unit: 2822

the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description:

Fig. 1, #'s 24,30,32,34 and 36 and

Fig. 2, #'s 59,62 and 66

Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The disclosure is objected to because of the following informalities: Claim 2 discloses the encapsulant made of **industrial plastic material and encapsulant and frame layer integrally formed**, this limitation is not disclosed in the specifications.

Art Unit: 2822

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1 and 4, as far as understood, are rejected under 35 U.S.C. 102(e) as being anticipated by Applicant's Prior Art (Figure 1).

Applicant's Prior Art discloses an image sensor package (Fig. 1) that comprises a plurality of lower metal sheets (10) arranged in an array, each of the lower metal sheets having an upper surface (26) and a lower surface (28), a first hole, a plurality of upper metal sheets (12) arranged in an array, each of the upper metal sheets having an upper surface (38) and a lower surface (40), and a second hole penetrated from the upper surface to the lower surface, and the second hole being corresponded with the first hole of the lower metal sheets, the lower surface of the upper metal sheets being stacked on the lower metal, an encapsulant (14) for encapsulating the lower metal sheets and the upper metal sheets and the encapsulant filled into the first hole and second hole to tighten the upper metal sheets and the lower metal sheets, wherein the upper surfaces of the lower metal sheets are exposed from the encapsulant, the lower surfaces of the

Art Unit: 2822

lower metal sheets are exposed from the encapsulant and electrically connected to the printed circuit board (32), and the encapsulant is formed with a frame layer (16) around the upper surfaces of the upper metal sheets to define a chamber (42) together with the upper metal sheets, a photosensitive chip (18) being arranged within the chamber; a plurality of wires (20) for electrically connecting the photosensitive chip to the upper surfaces of the metal sheets and a transparent layer (22) arranged on the frame layer of the encapsulant to cover the photosensitive chip.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 2 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's Prior Art in view of Mahulikar (U.S. Patent 5,098,86).

Applicant's Prior Art discloses all the limitations except for the transparent layer to be transparent glass and for the encapsulant and frame integrally formed.

Whereas Mahulikar discloses a pin grid array (Fig. 2) that contains a chip (32), a base component (12) with a frame (38) and encapsulant (16) formed of plastic, which are integrally formed and a transparent layer (36) formed of transparent glass. The transparent layer is formed of transparent glass to better bonding to the frame. (Column 5, lines 40-47) Therefore it would have been obvious to one having ordinary skill in the

Page 6

Application/Control Number: 10/705,377

Art Unit: 2822

art at the time the invention was made to modify the device of Applicant's Prior Art by incorporating the transparent layer formed of transparent glass for better bonding to the frame as taught by Mahulikar. In regards to the frame and encapsulant being integrally formed, "Integral" is sufficiently broad to embrace constructions united by such means

Conclusion

as fastening and welding. In re Hotte 177 USPQ 326. (1973)

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kiesha L. Rose whose telephone number is 571-272-1844. The examiner can normally be reached on M-F 8:30-6:00 off 2nd Mondays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Amir Zarabian can be reached on 571-272-1852. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
